SOFTWARE ENGINEER

Full Stack Developer with 2+ years of experience in designing and delivering scalable software solutions for enterprise clients. Proven expertise in Python, JavaScript (ES6) and modern frameworks, and machine learning integration with a focus on optimizing system performance and enhancing user experiences. Adept at collaborating with cross-functional teams to meet project goals efficiently using Agile and Scrum methodologies.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript (ES6).
- **Frontend Development:** React.js, HTML5, CSS3.
- **Backend Development:** Node.js, Express.js, Django, Flask, REST API, Micro services.
- **Databases:** MySQL, PostgreSQL, MongoDB.
- **DevOps:** Docker, Jenkins, CI/CD pipelines.
- **Software Development Tools:** Git, GitHub, Visual Studio Code, Postman.
- **Other Skills:** Data Structures and Algorithms, OOP, Agile & Scrum methodologies, Jira.

PROFESSIONAL EXPERIENCE

Tech Mahindra, Bengaluru, India

11/2024 – present

Software Engineer

- Developed a data visualization platform, leveraging JavaScript to aggregate and analyze data from multiple sources, providing actionable insights.
- Optimized API interactions by implementing efficient data-fetching techniques, reducing latency and improving application performance.
- Enhanced UI/UX design, ensuring a seamless and intuitive user experience by integrating interactive charts and dynamic visual elements.
- Expanding expertise in DevOps, currently upskilling in Docker, AWS, and Jenkins to streamline deployment, automation, and cloud infrastructure management.

Dell Technology, Bengaluru, India

08/2021 – 02/2024

Software Engineer

- Developed applications using Python, React.js, and MongoDB, which enhanced system reliability by 30% and reduced project delivery times by 20% through effective bug resolution.
- Worked closely with clients and internal teams to ensure technical solutions aligned with business objectives, resulting in a 15% increase in customer satisfaction.
- Implemented robust CI/CD pipelines to streamline the software development lifecycle, cutting deployment errors by 40% and accelerating release cycles.
- Contributed to the development of a platform for over 5,000 users using the MERN stack and Docker, achieving a 20% reduction in processing time, a 30% improvement in communication efficiency, and a 35% increase in deployment speed.
- Engineered an automated ticket management solution with Python, Flask, MongoDB, and machine learning techniques, reducing ticket redundancy by 40% and manual intervention by 50%.
- Leveraged Kubernetes for container orchestration, ensuring seamless scaling and maintaining a 99.9% system uptime.

EDUCATION

Masters of Technology, Manipal Institute of Technology, Manipal

July 2022

- Computer Science and Engineering (CGPA: 8.89 / 10)

Bachelor of Engineering, NMAM Institute of Technology, Nitte

June 2020

- Computer Science and Engineering (CGPA: 9.05 / 10)
