Address- Near Lions Airport City

Hospital, 2nd Cross, Lakshmi Layout,

Bangalore – 560037

PROFESSIONAL OBJECTIVE

- **12+ years of experience in IT field with strong conceptual skills in Development, QA, Production Database Development, Administration and Enterprise Architect.** Extensive experience across multiple DBMS and platforms provides a strong aptitude for multidimensional database design coupled with a robust operational architecture.

PROFILE

- IT professional of 11 Years experience in Oracle, SQLServer, PostgreSQL, MySQL, IBM DB2, IMS DB, SAP HANA, Mongo, Maria, Elastic Search, Cassandra, Informix, Sybase, Couch, Redis, Teradata, DynamoDB, Cosmos DB, Single Store, Yugabyte, FoundationDB, KeyDB, Aerospike, Influx, Graph, GreenPlum, Snowflake, ClickHouse, Amazon Redshift and Monet Database Administration.
- Proficiency in Oracle Stand alone Database and RAC Database (26ai, 23c, 21c, 20c, 19c, 18c, 12c, 11g, 10g, 9i, 8i, 8, 7, 6) Administration.
- Strong Experience on Oracle Exadata, Oracle Golden Gate, Oracle Apps Technical, Oracle Fusion Middleware, Oracle EBS, Oracle Apps DBA, Oracle CRM, Oracle Weblogic and PeopleSoft DBA, OCI .
- Strong Experience on Java, J2EE, JDBC, Servlet, JSP, Spring Boot, Hibernate, MicroServices, Web Services.
- Strong Experience on VB .Net, ADO .Net, ASP .Net Web technology, MVC, AJAX, JQUERY, XML, WCF, LINQ, Silverlight, Angular, NodeJS, React JS, Entity Framework, Web API and Web Services.
- Strong Experience on PHP technology that is on Content Management System, Joomla, WordPress, Drupal, Laravel Framework, React/Angular, JQuery, Mysql, NextJS, CakePHP.
- Experience on Android, UI, Pega, Python Development like PySpark, Pandas, NumPy, SonarQube, Python web Framework like Django, Flask and Python testing framework like Pytest, PyUnit, Testify, Doctest.
- Experience on Cloud based integration platform and Leading IPaaS that is DellBoomi.
- Designed the web application by using HTML5, CSS3 and JavaScript.
- Experience on Open source programming language Golang and Server side web framework RubyonRails.
- Experience on Data Science, Data Mining, Data Modelling, Data Designing, PowerBI, MSBI, RPA Tools like Blueprism, Pega, Open Connect and DevSecOps Tools.

- Experience on Open Source analytic engine that is Apache Framework, Apache Hive, Apache Kafka and Bigdata Hadoop.
- Strong Experience on Vmware Admin, Windows Admin, Network Admin and Storage Admin.
- Experience on all the SAP Products, Uses of SAP ERP Software and worked on SAP ABAP with SAP HANA database.
- Strong experience on Manual testing like Black box testing, Whitebox testing, Load Testing, Sanity Testing, Re-Testing, Regression Testing, Unit Testing, Integration Testing, System Testing, User acceptance Testing, highly demanded automation testing tool like QTP, QC, Bugzilla bug tracking tool, JMeter open source load testing tool and open source Selenium with BDD Cucumber Framework.
- Experience in Confluent Kafka administration and CDC setups.
- Healthy experience on Devops Containers like Docker, Kubernetes, Jenkin, Github, Prometheus, Apache Maven, Nagios and CI/CD pipeline.
- Experience on Open source visualization tool like Grafana and Kibana.
- Builded and Administrated on (Physical Standby, Logical Standby, Snapshot Standby), Dataguard.
- Performed Database Refresh from Production to Test and Development Databases.
- Proficiency in RMAN and Cross platform Database Migration by using Various Methods.
- Experience on CloudOps, Data visualization tool like Tableau and Informatica tool-ETL.
- Good exposure on enterprise schedule like Control-M, AutoSys and DAG on Airflow.
- Working knowledge of OEM(19c, 18c, 13c, 12c, 11g and 10g), DBTUNA, Oracle Zenoss, DataDog, Appd, PEM, Freshdesk, Rundeck, Zabbix, Nagios, Cloud-watch, NewRelic, Cacti, Gnaglia Monitoring tools.
- Planning for Backup and Recovery of database information and maintaining Hot Backups(Daily), Cold Backups(Weekly), RMAN and Logical Backups using Data Pump & Traditional Export and Import.
- Strong experience on Microsoft AZURE, AWS, GCP, Oracle and IBM Cloud.
- Experience with application performance monitoring/load testing/mapping tools and practices.
- Experience working with message queue technologies such as RabbitMQ or Kafka.
- Experience with configuration management tool such as Salt, Puppet, Chef, Packer, Vagrant.
- Experience on Salesforce Development, Testing and Cloud.
- Experience on old technology like IBM Mainframe that is on Cobol, JCL, DB2, IMS, VSAM and AI&ML such as GenAI, Deep Learning, NLP, Tensorflow, Pytorch for algorithm purpose.
- Strong experience on R, Python Programming, infrastructure as code tool like Terraform and used world's leading AI-powered developer platform like Github i.e Version Control System.
- Refreshed Schema Sync-up effectively and worked on Open AI such as ChatGPT and Google Bard.

- Strong experience on Unix and has good understanding of Shell, Python, Perl and Groovy Server side Scripting language.
- Extensive knowledge and experience on new features in 12c (From 12c-creating and managing CDB and PDB i.e Oracle Multitenant Architecture).
- Administering Oracle Clusterware, ASM Instances, ASM Disk Groups, RAC Instances and Databases.
- Administration and maintenance of multiple nodes in RAC production environments.
- Addition and Deletion of Nodes in the Cluster and Addition of Instances in RAC.
- Strong Migration experience from non-ASM Database (Cook File System) to ASM and converting Single instance Database to RAC Database.
- Expertise on new Features from 12cRAC (Oracle Flex Cluster, Oracle Flex ASM).
- Involved in Database Cloning by various methods and worked on Performance Tuning.
- Good Experience in Database Administration with Red Hat Enterprise and Ubuntu Linux, IBM AIX, HP-UX, Solaris and windows performing DBA duties like Installation, Configuration, Patching, Upgradation, High Availability and Replication (On 23c,21c, 20c, 19c, 18c, 12c, 11g, 10g, 9i, 8i, 8, 7, 6).
- Interpretation of AWR, AWR Differential, ADDM, ASH Report and Oracle Tools for Performance Tuning.
- Configuration and managing DataGuard Broker by using DGMGRL command Line Interface.
- Responsible for creating and managing DBLINK on distributed Databases.
- Worked on Transportable Tablespace, Database Refresh, Database Encryption & Decryption and Database Migration.
- Good Knowledge on Patching and Upgradation of RAC Environments.
- Responsible for support of all Production, PreProduction, Development, Quality, UAT and Test Databases.
- Experience on Data Ware House and OLTP database.
- Followed the process of Agile Methodology such as Kanban, Scrum and SDLC life cycle model.

TECHNICAL SKILLS

Operating System	Windows, Linux, IBM-AIX, HP-UX, Solaris
Language	C, Advance C, C++, Java, C#.Net, PHP, Ruby On Rail, SAP ABAP, Python, SQL/PLSQL, T- SQL
Databases	SQLSERVER(2022,2020,2019,2017,2016,2014,2008,2005,2004), POSTGRESQL(17,16,15,14,13,12,11,10,9),MYSQL(8.0,5.7,5.6,5.5,5.1), MONGO(5.1/0,4.4/2),MARIA(11,10),MONET(11.35.9,11.35.3)
Oracle Utilities	DBCA,NID, Expdp/Impdp, RMAN, DBUA, NETCA, NETMGR, ASMCMD, ASMCA, DGMGRL, TKPROF, TRCSSESS, NID

PROFESSIONAL EXPERIENCE

- Joined as a DBA Architect in **Experis IT ManPower Group** from April-2024 to May-2024.
- Joined as a Senior Principal Development Engineer on **Calsoft Inc.** from April-2022 to Feb-2023.
- Joined as a Senior Engineer on **Cigniti** from Dec-2021 to April-2022.
- Joined as a Senior Software Engineer on **Neosoft Technology** from Feb-2021 to June-2021.
- Joined as an IT Operational Analyst on **Accenture – Permanent** from May-2016 to July-2017.
- Joined as a Dotnet Developer on **Comsoft Solution** from Aug-2013 to Nov-2013.
- Passed BTech in Computer Science Engineering from **Majhighariani Institute Of Technology and Science (MITS)**, **Biju Patnaik University of Technology (BPUT)**, Odisha on 2013 and secured 7.2 CGPA (65%).
- Passed 12th from **Nimapara College** (CHSE Board), Puri, Odisha on 2009 and secured 60%.
- Passed 10th from **G.C.D. High School** (HSC Board), Rayagada, Odisha on 2007 and secured 60%.

CLIENT

Microsoft, Bharat Scout and Guides, Cleartrip, Woolies, ITV Hub, HPE, 1Pay, AT&T, Infosys, HCL, Mphasis, IRI, Warnerbros, Vaccine Information Management System, Capital Group, Axis Bank, Amdocs, DXC Technology, NetCracker, Atos Syntel, Harman A Samsung Company, Paypal, Cigniti, Neosoft, IRCTC IT Center, SBI IT Center, FHP, Financial Times, MMI, LT, XLC, FT, Illinois Tollway, Cetera Financial Services, Etihad Airway, Cognizant SoftVision, Teamlease Digital, Zyoin, Softenger, Solugenix, Landmark Group, Incedo, Aarav Software, Locuz, Sankhya Infotech, QuarkXPRESS, CHS, Trimax IT, Croyant Technology, Kalpita Technology, Harini Soft Solution, Comsoft Solution, Blackbuck, Razorpay

Projects#1

Project Title : AT&T-Microsoft

Role : Solution Architect

Environment : Oracle(23/21/20/19/18/12c,11/10/g,9/8i),
OEM(19c,18c,13c,12c,11/10g), Microsoft Azure, AWS, GCP
Oracle Cloud, IBM Cloud, SQL Server(2022,2020,2019/17/16/08/
05/04), Postgresql(16,15,14,13,12,11,10,9), Mysql(8.0,5.7/6/5),
Linux, Windows, HP-UX, IBM-AIX, Solaris

Project Details:

AT&T Inc. is an American [multinational conglomerate holding company](#) headquartered at [Whitacre Tower](#) in [Downtown Dallas, Texas](#). It is the world's largest telecommunications company, the largest provider of [mobile telephone](#) services, and the largest provider of [fixed telephone](#) services in the United States through [AT&T Communications](#). Since June 14, 2018, it is also the parent company of mass media conglomerate [WarnerMedia](#), making it the world's largest media and entertainment company in terms of revenue. As of 2018, AT&T was ranked #9 on the [Fortune 500](#) rankings of the largest United States corporations by total revenue.

Responsibilities:

- Experience on OCI and AI.
- Maintain, Monitor and Support Peoplesoft components such as Weblogic, Tuxedo, Process Scheduler, Integration Broker and Application messaging on Solaris, Windows and Oracle Infrastructure.
- Install and configure People Tool components like Integration Broker, Interaction Hub, Secure Enterprise Search (SES), People Soft Test Framework.
- Setup and Configure Integration broker gateway, services, service operations, queues, routing and application messages for internal and external integrations.
- Container management, building & updating images, managing registries, Orchestration, CI/CD Pipeline Integration, security & Compliance, Storage & Volume management in docker.
- Cluster health monitoring, Deployment management, Resource Optimization, CI/CD Pipeline support, Security & Access Control, Cluster maintenance in Kubernetes.
- Install new Peoplesoft environments and refresh non-production Peoplesoft environments.
- Monitor system performances and administration services for all of the peoplesoft environments.
- Managing SSIS deployments, create and manage SQL Server Agent jobs for SSIS package execution, upgradation of SSIS packages.
- SSRS Server Installation & Configuration, Managing SSRS database, Report deployment & management on SSRS.
- SSAS installation & Configuration, managing SSAS databases cubes/models, managing SSAS backups & Recovery.
- Assist with debugging and tuning the batch cycle.
- Migrated the database from Oracle to SAP.
- Plan and execute data extraction from Oracle.
- Cleanse, transform and validate data for SAP.
- Load data into SAP using tools like LSMW, BODS or SAP data services.
- Reconcile migrated data with legacy Oracle system.

- Adjusted firewall rules on pfSense to allow new application traffic while maintaining security policies.
- Migrated the Oracle, SQL Server, PostgreSQL, MySQL, Mongo, Maria databases from On-premises to Microsoft Azure and GCP.
- Migrated the Oracle, PostgreSQL, MySQL database from on-premises to AWS by using AWS RDS, DMS, SCT, MGN and CMF.
- Provided Solution to the SITeam on the multiple Databases like-Oracle, SQL Server, PostgreSQL, MySQL, MongoDB, Elasticsearch, Cassandra, MariaDB.
- Migration from SQL Server to PostgreSQL database by using SSIS and Sqlserver2pgsql method.
- Used PostgreSQL for PostgreSQL database and experience on with Oracle application like EBS, B2CBA with understanding for application technology stack of 11i, 12.1.x & 12.2.x.
- Migration from Oracle to PostgreSQL by using Ora2Pg recommended tool.
- Integrated Terraform scripts with CI/CD tools (e.g. Jenkins, GitLab CI/CD, or AWS Code Pipeline) to create fully automated deployment pipelines reducing manual intervention and accelerating delivery times.
- Setup multi-environment configurations with Terraform workspaces and modules to ensure consistency and simplify promotion across environments.
- Administered on InnoDB, MyISAM for storage engine in MySQL database and MySQL Aurora for migration.
- Administered on Performance Insight for MySQL Aurora instance.
- Used Percona the open source database Software for MySQL database in the project.
- Performed load balancing by using HAProxy and ProxySQL on MySQL database.
- Configured the mutt client for receiving the mail on the server.
- Configured the SSL Certificate for MySQL on DataDog monitoring tool.

- Worked on Galera Mysql Cluster which provides no data loss, high system uptime and scalability for the future growth.
- Worked with Cloud Foundation Team.
- Fixed Super Privilege issue on Mysql database.
- Worked on multiple databases with SaaS, PaaS, IaaS, DBaaS services.
- Worked on Database Movement, Database Synchronization and Cutover Activities in each application.
- Worked on the critical or high end Microsoft application and resolved the database queries on multiple databases in the project.
- Worked on the DBForms and Database Questionnaires for providing the solution.
- Hands-on experience on GCP Cloud design concepts(Regions, Pub Sub, Availability Zones, ApigeeX, GKE, NSG, VPN, VPC, Subnets, Private/Service endpoints, Firewall setup).
- Hands-on experience with Azure SQL, Azure Resource Manager, Resource Groups, Virtual Networks, Azure virtual Machines, Azure Blob Storage, PowerShell DSC, Azure Automation, Azure Active Directory, Azure Data Factory, Data Lake and Azure Site Recovery.
- Experience in developing and deploying Cloud Native Applications using Azure PaaS Capabilities (App Service Plans, Key Vault, SQL Azure DB, Azure Functions, Containers, AKS, Logic Apps, Service-Bus, Event Grid, API Management).
- Hands-on experience with AWS services for SaaS products such as VPC, EC2, Containers, ECS, EKS, S3, ELB/ALB, ElastiCache, Redshift, RDS, Lambda, Route53, Cloud Formation, CloudWatch, IAM, SNS, SQS, Kinesis, Glue, Code Commit, Code Pipeline, Code Build, Code Deploy, Elastic Bean Stalk, Cloud Trail, Document DB, DynamoDB, API Gateway and others Development of Test Automation for web based systems(both UI and Backend) for different product lines.
- Replicated the Oracle Database using Oracle GG.
- Administrated in single Exadata DMA on Oracle Exadata.
- Worked on Full Rack, Half Rack, Quarter Rack, Eighth Rack on Oracle Exadata and administrated on Oracle Exadata Database Cloud Service that is ExaCS.
- Administrated of Oracle Exadata on X86 server and uses of ExaCC, Exachk, CellCLI on Exadata.
- Assisted on configuration of RMAN for taking physical backup of the database.
- Restored the dumps of multiple databases.
- Worked on Oracle Database Vault, Oracle wallet and audit in the project.
- Deployment and Designing the architecture on the databases.
- Worked on Oracle Forms and Reports.
- Administrated on Log Shipping, Mirroring and Always ON for SQLServer database.
- Worked on the Database link for Data Transfer between the Databases.
- Modified connection properties using sqlnet.ora parameters on Oracle Database.
- Administration of Production, Pre-Production, UAT, Development, Test Databases.
- Provided On-call support on the databases.

Projects#2

Project Title : Woolworth SuperMarkets

Role : Lead DBA

Environment: Oracle(21/20/19/18/12c,11/10g,9i),OEM
(18c, 13c, 12c, 11/10g), AWS, Microsoft Azure, Oracle Cloud,
Sql Server(2019/17/16/08/05/04)

Project Details:

Woolworths (colloquially known in Australia as "**Woolies**") is an Australian chain of [supermarkets](#) and [grocery stores](#) owned by [Woolworths Group](#). Founded in 1924, Woolworths today is Australia's biggest supermarket chain with a market share of 33% as of 2019. Woolworths specialises in groceries (vegetables, fruit, meat, packaged foods, etc.), but also sells magazines, DVDs, health and beauty products, household products, pet and baby supplies, and stationery. As of the end of June 2020, there were 987 Woolworths supermarkets and 64 Woolworths Metro [convenience stores](#). Woolworths Online (formerly HomeShop) is a "click and collect" and home delivery service for Woolworths supermarkets.

Responsibilities:

- Migrating database from Exadata X2 and X3 machines to Exadata X6 machines.
- Created OEDA requirement document for Oracle to setup the new Exadata X6 machines.
- Worked with Storage team in configuring Netbackup and Data domain on Exadata X6 machine.
- Worked on SPARC-powered Exadata configuration that is Exadata Supercluster.
- Administered on Exadata Exascale for Cloud integration in Oracle Exadata.
- Performed Deployment on database by Roll forward and Rollback.
- Killing the inactive and blocking session after getting the permission from the client on a daily basis.
- Managed the CPU Utilization, Memory Utilization, Tablespace Utilization issues. Client-side fault tolerance achieved by configuring TAF in RAC as well as Dataguard environment.
- Integrated security and compliance checks into Terraform templates by embedding AWS IAM roles, security groups, and encryption policies, ensuring each provisioned resource meets compliance requirements.
- Tuning of SQL queries by using SQL Tuning Advisor, SQL Toad, SQL Loader, Encryption and Decryption, Network and security Administration, Capacity Planning on Database.
- Performed table copy between the database to database.
- Generated the execution plan and interpretation of execution statistics by tkprof utility and used Statspack in the project.
- Purged the SQL statement from the shared pool.
- Working knowledge of script in a background level by using nohup.
- Stopping the Database services in the Windows environment for Windows patching activity.
- Performed the table and view copies between the Oracle to Oracle and Oracle to Monet Database.
- Performed logical backups using Export utility and restoring specific object or schema using Import utility.
- Monitored and performed daily incremental backups, weekly backups by using RMAN.
- Checking of Oracle alert logs and see whether there are any Oracle errors requiring action.
- Interpretation of AWR and AWR Differential Report.
- Done the Alert Log File Maintenance i.e renaming of alert log file and monitoring the alert log file.
- Run the stats on the index and table.
- Built the physical standby and always maintained the sync between the production.
- Created and managed standby databases at remote location using Dataguard technology.
- Placed the database devices on different hard disk to reduce disk I/O contention and speed up performance using ASM.
- Monitoring the alert log for the database performance and resolving the performance issues.
- Working under the environment of 24x7 DBA support.

Projects#3

Project Title : IRI – Information Resources, Incorporated
Role : Lead DBA
Environment : Oracle (18c,12c,11g,10g,9i), Postgresql(11,10,9),
Monet (11.35.9, 11.35.3), Azure, AWS, GCP, Linux,
Windows

ProjectDetails:

IRI is a market research company headquartered in the U.S. which provides clients with consumer, shopper, and retail market intelligence and analysis focused on the consumer packaged goods (CPG) industry. In September 2013, IRI acquired Aztec, a provider of market measurement and related services for consumer packaged goods (CPG), liquor and pharmaceutical manufacturers and retailers in Australia, Canada, Hong Kong, New Zealand, South Africa, Sweden and the United Kingdom. This was the largest acquisition in IRI's history and significantly expanded IRI's geographic presence.

Responsibilities:

- Performed Schema Sync-up refresh on the database.
- Worked on different activity by scheduling the job in the crontab.
- Performed backup and restore by using isql command line utility on Sybase database.
- Gathered table level, Schema level, index level and full database level stats manually.
- Performed failover and switchover kind of activities in production and DR.
- Gathered the table which has invalid and obsolete statistics.
- Fixing the P1 kind of issues through by raising the SR on Oracle Support.
- Changing the password of the user and unlocking the user account.
- Installing Database Server and Client/Server configuration for database connectivity.
- Allocating systems and planning for future storage requirements on the database.
- Performing and monitoring regular User Managed and RMAN Backups, Database Recovery techniques.
- Checking the full and archive log backup status, fixing the issues regularly and sending that report to client.
- Checking expired backup, obsolete backup and uses of Crosscheck backup on Oracle database.
- Regularly reviewed, refactored Terraform codebase, deployment workflows to enhance efficiency and adopt new Terraform features or AWS services.
- Monitoring and optimizing the performance of the Database and application.
- Involved in DBA activities, supporting Production Environments.
- Creating Database links to access the data from remote databases.
- Creating, maintaining, dropping, monitoring of Dictionary Managed

Tablespace and adding/resizing of datafile.

- Creating users & privileges with appropriate roles and levels of security.
- Released the temporary tablespace spaces.
- Adding the roles, profiles to the user upon request.
- Adding the datafiles into the tablespace to manage volume of the tablespace is under Threshold.

Projects#4

ProjectTitle : ISTHAA(IllinoisTollway)
Role : Senior Database Administrator
Environment: Oracle (12c, 11/10g, 9i), OEM (13c, 12c, 11/10g), AWS, MicrosoftAzure,SqlServer(2016/08/05/04),PostgreSql(11,10,9),Linux,Windows,

ProjectDetails:

The **Illinois Tollway** is dedicated to providing and promoting a safe and efficient system of highways while ensuring the highest possible level of service to our customers. Whether it's I- PASS, the *Move Illinois* Program, open road tolling or keeping you safe with our H.E.L.P. trucks, we are committed to delivering great benefits and services to customers.

The Tollway is a user-fee system—nostate or federal tax dollars are used to support maintenance and operations. Operations are funded by toll and concession revenues

Responsibilities:

- Starting and stopping of LSP, registering the skip procedure with SQL Apply, enabling and disabling of guard in Logical Standby.
- Adding and recreating of tables in Logical Standby. Checking the DDL transaction which is applied and skipped in Logical Standby by using data dictionary views.
- Gathered the table level and schema level stats by using script and manually.
- Created Read Only user.
- Performed the table copy between the databases by using scripts.
- Created the Materialized view and performed the refresh in a different way and the use of `dbms_refresh`.
- Rebuild index with online and manually which is in parallelized and No Logging Mode.
- Daily performing health check report and making weekly and monthly report of the production databases.
- Administration of `crsctl`, `srvctl`, `cluvfy` utility in a cluster and managed logs generated by the services.
- Performed the failover operation in the cluster by enabling the TAF.
- Managed the diskgroups in the ASM by setting the attributes.
- Converted the single instance Database to RAC Database by using `rconfig`.
- Handled the integrity and backup of OCR, OLR and Voting Disk on a daily basis.
- Performed the Oracle Cross Platform migration by using export & import, transportable tablespace and without using export & import with minimal downtime.
- Tuning of SQL queries by using SQL Tuning Advisor.
- Worked on bash and Power Shell scripting in the project.
- Performed the operation of Switchover and Failover between production and standby database.

- Managing the I/O response, I/O latency by interpreting read time, execution time, physical read from the AWR report.

- Performed logical backups using utilities like expdp & impdp (DataPump) and traditional backup(exp&imp).
- Upgraded and downgraded the databases from version to version.

Projects#5

Project Title : **The ITV Hub – The Home Of ITV**
Role : Senior Database Administrator
Environment :Oracle(12c,11g,10g,9i),SQLServer(2016,2008,2005,2004),
 AWS, Linux,Windows

ProjectDetails:

ITV is a commercial TV network in the United Kingdom launched in 1955 as Independent **Television** under the auspices of the Independent Television Authority (ITA, then after the Sound Broadcasting Act 1972, Independent Broadcasting Authority, now Ofcom) to provide competition to the long established BBC, it is also the oldest commercial network in the UK. Since the passing of the Broadcasting Act 1990 its legal name has been **Channel 3**, to distinguish it from the other analogue channels at the time, namely BBC 1,BBC 2 and Channel4.In part, the number 3 was assigned as television sets would usually be tuned so that the regional ITV station would be on the third button, with the other stations being allocated to the number within their name

Responsibilities:

- Performed the Database Refresh from Production to Development and Test Database.
- Monitoring space, wait events, locks and long operations running on the database.
- Checking the Tablespace usage, Instance uptime, O.S uptime, ASM disk space usage, Listener Status, RMAN Backup status, Agent Status, Cursor pin check, Load Average, Alert Logfile Status, Disk Space Usage, physical standby sync status, Logical standby sync status, Long running queries, node availability status on a daily basis.
- Created and administration on Tablespaces, Rollback Segments, Users, Roles and Profiles.
- Doing up the DR.
- Analyzing the Schema and database size.
- Performed the operation of user account lock and unlock.
- Cloning the database using cold backup, RMAN and duplicacy using RMAN.
- Monitoring and optimizing the performance of the Database and applications.
- Analyzed and rebuilt of Indexes.
- Deleted the archive log file by using archive log policy.
- Updated Patches to application software.
- Generated the execution plan of SQL by using explain plan.
- Generated execution plan and interpreted the execution statistics by using auto tracing and dbms_xplan.display_cursor.
- Managed the DB locked issue and schema import request.
- Shared the list of tables by using invalid and obsolete statistics.
- Managed the High ASM Utilization of server issues.
- Creating users & privileges with appropriate roles and levels of security.
- Performing the query caused performance issues in an effective way.
- Installation & Configuration of Oracle Software and database creation in multiple O.S.
- Maintenance of Database and Listener.

- Reporting changes to senior DBA.

Projects#6

ProjectTitle	:Warner BrosEntertainment
Role	:Senior Database Administrator
Environment	:Oracle(12c,11g,10g,9i),PostgreSql(11,10,9),AWS Windows, Linux

ProjectDetails:

Warner Bros. Entertainment Inc.(simply known as **Warner Bros** and abbreviated as **WB**), also commonly known as **Warner Bros. Pictures, Inc.**, is an American entertainment company headquartered in [Burbank, California](#), and a division of [AT&T's WarnerMedia](#). Founded in 1923, it has operations in areas such as [film](#), [television](#), and [video games](#) and is one of the "[Big Five](#)" major American [filmstudios](#),as wellas amember of the[Motion PictureAssociation](#)(MPA).

Responsibilities:

- Administered the database on Exadata Box and checked the health status on Oracle X86 machine by using Exacc utility.
- Administrated on Extract and Replicat process for Oracle Golden Gate.
- Installation & Configuration of Oracle Software.
- Performed housekeeping and checked backup status in all RDBMS and NoSQL databases.
- Administration of logical backup by Expdp and Impdp.
- Added the diskspaces into another disk i.e., used logical volume manager in Microsoft Azure.
- Administered on AWS and Microsoft Azure.
- Troubleshooting P1 issues.

Projects#7

ProjectTitle	:Paypal
Role	:Senior Database Administrator
Environment	:Oracle(10g,9i),SQLServer(2008,2005),Postgresql,MySQL Linux,Windows

ProjectDetails:

PaypalHolding,Inc established in 1998, PayPal went publicthrough an IPOin 2002. It becameawholly owned subsidiary of eBay laterthatyear,valued at \$1.5billion.In 2015eBay spun off PayPal to its shareholders, and PayPal became an independent company again.The companywas ranked 143rd on the 2022Fortune 500 of thelargest United States corporations byrevenue.

Responsibilities:

- Implemented Best Practices for migration E-Business Suite and regular databases to Oracle Exadata.
- Zero Downtime Migration to Oracle Exadata with Oracle DataGuard and Oracle GoldenGate.
- Worked on setting up agents on Exadata x86 machines for monitoring.
- Familiar with conflict detection, uni directional, bi-directional GoldenGate Environments.
- Migrated databases for applications like Peoplesoft, GitHub, AtlassianJira, DataStage, BuildForge, Oracle WebCenter Sites and Confidential website.

- Administered on SQLServer Migration Assistant(SSMA) i.e. in SQLServer Database.
- Administered in pgAdmin, pgBackRest, pgBadger monitoring tools on PostgreSQL database and MySQL Workbench, Monyog on MySQL database.
- Administered on backup and disaster recovery solution i.e Barman in PostgreSQL database.
- Administered on configuration file i.e. pg_hba.conf, postgresql.conf, pgbouncer.conf in PostgreSQL database, binlog on MySQL database, T-log on SQLServer, Opslog and sharding on MongoDB database.
- Worked on CRUD operation in MongoDB.
- Worked in enabledlogs, disabledlogs, enabled variables, disabled variables, store functions on MySQL Databases.
- Performed backup and restore of MySQL database using mysqldump and mysqlrestore command line utility.
- Worked on PgPool and PgBouncer for tuning purpose in PostgreSQL database.
- Taken backup of PostgreSQL database by using pg_dump, pg_dumpall, and pg_basebackup command line utility.
- Administered on high availability i.e., AlwaysON for SQL Server database.
- Administered on Datadog monitoring tool for MySQL database.
- Configured OLAP in the Oracle databases.
- Giving the privileges and roles to the database users.
- Worked with the developers for the development databases.

Projects#8

Project Title	:Diesel Locomotive Work, DLW-IRCTC (Indian Railway, Central Govt.)
Role	:Senior Oracle Database Administrator
Environment	:Oracle 11g, HP-UX

Project Details:

Diesel Locomotive Works (DLW) in [Varanasi, India](#), is a production unit of [Indian Railways](#), that manufactures diesel-electric [locomotives](#) and its spare parts. It is the largest diesel-electric locomotive manufacturer in India. It is located on DLW to BHU road of the metropolitan city of [Varanasi](#).

Founded in 1961, the DLW rolled out its first locomotive three years later, on 3 January 1964. It manufactures locomotives which are variants based on the original [ALCO](#) designs dating to 1960s and the [GM EMD](#) designs of the 1990s.^[2] DLW has an annual production capacity of 250 locomotives^[3] and plans to increase it to 275 based on the current demand. Since inception, DLW has produced total 8099 locomotives (up to 31 January 2018) of various types. DLW now manufactures "More than one locomotive a day". DLW manufactured 334 diesel-electric locomotives in last financial year 2016-17, which is the highest ever loco production by any loco manufacturing unit in India and bagged the "Best Production Unit Shield" for the second successive year.

Responsibilities:

- Installation & Configuration of Oracle Software and database creation in HP-UX O.S.
- Created Oracle VM, Database creation on Microsoft Azure.
- Built RAC from scratch.
