

Hemant Kumar

SAP B1 Technical Consultant | SQL Developer | .NET Developer

Email: hemantpvs8@gmail.com | Phone: +91 – 9065319500

Professional Summary

Experienced **ERP and software professional** with **3 years 11 months** of experience as an **SAP B1 Technical Consultant, SQL Developer, and .NET Developer. Proficient in C# (C-Sharp), JavaScript, AJAX, and ADO.NET** for web application development. **Skilled in SAP Business One, SQL, and HANA for efficient database management.** Strong problem-solving abilities with experience in database optimization and process automation to improve system efficiency. Adept at collaborating with stakeholders, resolving ERP issues, and delivering solutions that enhance business performance.

Professional Experience

. NET Developer

Pixon Green Energy Private Limited. | Sep 11, 2025 – Jan 1, 2026

- Implemented **dynamic date & time picker initialization using JavaScript**, removing dependency on fixed ASPX controls for cleaner and flexible front-end behavior
- Designed and optimized **complex SQL queries**, including pivot procedures, validation logic, duplicate prevention logic, performance tuning, duration calculations, and validation rules.
- Implemented automated **attendance pop-up** and built validation logic to prevent users from booking training.
- **Deployed Reminder Generator modules to LIVE**, ensuring smooth functionality in production.
- Transformed SQL logic to improve grid loading, resulting in **major performance improvements** across CRM modules.
- Optimized Training/Booking modules with **dynamic Date/Time picker initialization** using pure JavaScript for cleaner and more flexible UI behaviour.
- Designed and developed an Insurance Policy Management System using ASP.NET Core, supporting multiple insurance providers under a single platform. Implemented modules for policy creation, premium calculation, customer data management, and policy tracking.

ERP Administrator - SAP B1 Technical Consultant

Actylis - Aceto Pharma (India) Pvt. Ltd. | Aug 07, 2024 – Sept 06, 2025

- Handling all functional activities and providing day-to-day support and training to ERP users.
- Supporting core ERP modules including Finance, Purchase, Sales, and Inventory with strong exposure to master data and transactional processes.
- Possessing working knowledge of Manufacturing and subcontracting workflows within ERP systems.
- Managing ERP user administration, including user creation, role mapping, and permission set assignments in Navision.
- Monitoring system usage and ensuring adherence to organizational policies and access controls.
- Analyzing business processes and identifying opportunities for system improvements and optimization.
- Customizing and maintaining business reports for operational and management-level decision-making.
- Coordinating with ERP vendors/partners for issue resolution, enhancements, and requirement gathering.
- Ensuring data integrity, consistency, and accuracy across ERP systems.
- Performing regular database backups and supporting data security and recovery processes.
- Managing and maintaining database objects including stored procedures and queries.
- Designing, modifying, and maintaining Crystal Reports and other query-based reports.
- Creating and managing UDFs (User-Defined Fields), UDTs (User-Defined Tables), and FMS (Formatted Search).
- Providing timely resolution to user queries and ensuring smooth system operations.
- Supporting audit requirements by maintaining proper documentation and data validation.
- Collaborating with cross-functional teams to enhance system performance and usability.
- Assisting in data migration activities and validating migrated data for accuracy and completeness.
- Maintaining documentation for system processes, user guides, and standard operating procedures (SOPs).
- Supporting testing activities for system changes, upgrades, and enhancements.
- Ensuring continuous improvement in ERP processes aligned with business needs.

Software Engineer

Guljag Infotech (A Division of Guljag Industries Ltd.) | Feb 8, 2022 – May 22, 2024

- Collaborated on **application development** projects, **focusing on .NET frameworks** and database integration for streamlined operations.
- Developed and maintained web applications using **C#, JavaScript, AJAX, and ADO.NET** to enhance business operations.
- Created and optimized **dynamic and interactive UI components** using JavaScript and AJAX for a seamless user experience.
- Designed and implemented **stored procedures and database interactions** using ADO.NET for efficient data management.
- Designed and implemented **user-friendly interfaces**, improving application usability and adoption rates.
- Conducted daily maintenance tasks including **DML, DCL, TCL, DDL & DQL** queries and data import/export operations, ensuring data integrity.
- Engineered and modified **.NET applications** to meet evolving business needs, enhancing system functionality and **user experience**.
- Designed and implemented **SQL-based solutions** to automate inventory and financial data tracking, improving operational efficiency by 80%.
- Enhanced **database performance by optimizing queries, reducing execution time by 80%**.
- Developed **custom Crystal Reports** for client-specific requirements, improving decision-making efficiency.
- Designed and implemented **T-SQL procedures and functions**, automating data retrieval and report generation.
- Managed **database performance tuning, indexing, and query optimization** for large datasets.
- Provided **technical support**, resolving **ERP and database-related issues** within strict timelines.
- Implemented data integrity and security policies, managing user roles and access control.
- Designed and implemented user **access controls and permissions to ensure data security and compliance**.
- Developed **backup, migration, and restoration strategies**, ensuring **99.9% data availability**.
- Developed **stored procedures, views, and triggers** for automated data processing.
- Maintained database **backups, replication strategies, and disaster recovery plans**.
- Designed and optimized **SQL-based solutions** for inventory tracking and financial reporting.
- Developed and optimized **complex SQL queries** in SAP HANA Studio to enhance reporting efficiency and accuracy.

Strengths

Technical expertise, Problem-solving skills, Strong communication, Analytical thinking, Team collaboration, Project management

Key Skills

- **SQL & HANA Expertise:** Advanced query writing, optimization, data retrieval, and reporting.
- **ERP Systems:** SAP Business One, Tally data integration, and DTW-based migration.
- **Reporting Tools:** SAP Crystal Reports, automated reporting workflows.
- **Programming:** C#, .NET framework, XML.
- **Database Management:** SAP HANA, MS SQL Server (2012, 2016 and 2019).
- **Performance Optimization:** Query tuning, database indexing, and system troubleshooting.

Certifications

- **Google Data Analytics Certificate** (Completed: June 2024)
- **SAP Business One Certification** (Completed: March 2026).
- **DBMS Course - Master the Fundamentals and Advanced Concept.**

Education

Bachelor of Technology (B. Tech), Computer Engineering

Rajasthan Technical University | 2018 – 2022

Soft Skills:

- **Communication:** Skilled in translating technical information for non-technical stakeholders.
- **Problem-Solving:** Strong analytical skills in troubleshooting and optimizing system performance.
- **Leadership:** Led teams, mentored junior developers, and provided strategic project direction.
- **Teamwork:** Collaborated effectively with cross-functional teams to meet business goals.
- **Initiative:** Proactively identified opportunities for process improvement and innovation.
