To associate with a growth-oriented company and strive to achieve the goals of the organization, contemplating sustained individual growth through hard work and self-improvement, in any demanding work/working conditions .

EXPERIENCE

**Senior SAP Business One Functional /
Implementation Consultant** **May 2025-Till Date**
Difinity Digital

Industry: Manufacturing (Foam & Mattress)
Users: ~100 Concurrent Licenses | **Database:** SAP HANA

Project Summary:

Led an end-to-end SAP Business One implementation for a large-scale foam manufacturing unit, delivering a single-stretch go-live across core business functions with high user adoption and system stability.

Key Responsibilities & Contributions :

- Delivered end-to-end SAP B1 implementation from Blueprint, Configuration, UAT, Go-Live, to Post Go-Live Support.
- Executed single-stretch go-live across Finance, Sales, Purchase, Inventory, Production, and Dispatch modules.
- Designed and implemented end-to-end production process: Sales Order → BOM → Production Order → Goods Issue → Finished Goods Receipt → Delivery.
- Conducted shop-floor process study and aligned SAP B1 production workflows to real manufacturing challenges. Configured BOMs, routing logic, and Make-to-Order /
- Make-to-Stock scenarios specific to foam manufacturing. Managed Chart of Accounts (COA) migration, localization, GST setup, and financial controls.
- Prepared and obtained sign-off for Business Blueprint (AS-IS / TO-BE) documentation. Created project plan, milestones, and go-live readiness checklist.
- Led UAT planning and execution, including trial postings, data validation, and business sign-offs. Coordinated master data migration (Items, BOMs, COA, Business Partners) with accuracy checks.
- Prepared risk & issue tracker, mitigation plans, and client risk-acceptance documentation.
- Conducted end-user training, created user manuals and SOPs for finance, production, and operations teams.
- Delivered weekly status reports to stakeholders covering progress, risks, and action items.
- Developed Crystal Reports on SAP HANA for operational and management reporting. Provided post go-live support, issue stabilization, and user hand holding for smooth system adoption.

Key Outcome:

- Successful on-time go-live with minimal disruption
- Improved production visibility and inventory control
- Strong financial compliance and real-time reporting

AI Product Analyst & Business Analyst

Mar 2023- May 2025
Terzo Technologies Inc.

About the Role

As an **AI Product Specialist & Business Analyst at Terzo.ai**, I bridge the gap between **business needs and AI-driven contract management solutions**. I contribute to the development of an **AI-powered contract management platform** that extracts insights from contracts, generates **Quick reports**, and enables **voice-assisted report generation** while aligning with business goals and user requirements.

Key Responsibilities:

BUSINESS ANALYSIS & REQUIREMENT GATHERING

- Collaborate with **stakeholders, clients, and end-users** to gather business needs and transform them into product features.
- Conduct **competitive analysis** to benchmark Terzo Cloud's features against industry standards.
- Define and maintain **product road-maps, user stories, and business requirements**.
- Analyze **contract life-cycle management trends** to suggest improvements in AI-driven insights.

AI-DRIVEN CONTRACT ANALYSIS & INSIGHTS

- Develop and fine-tune AI models for **contract summary, validation, and expiration tracking**.
- Enhance NLP algorithms to **extract key contract clauses and risk insights**.
- Ensure contract insights align with **regulatory and compliance requirements** (e.g., GDPR, HIPAA).

PRODUCT DEVELOPMENT & AGILE METHODOLOGY

- Work in an **Agile environment**, refining the product through iterative improvements.
- Translate business needs into **clear Jira tickets** for developers.
- Conduct **sprint planning, backlog grooming, and stakeholder reviews**.

THIRD-PARTY API INTEGRATION & AUTOMATION

- Integrate with **Slack and other external platforms** for contract notifications and automated reporting.
- Work with **REST APIs and webhooks** for seamless data exchange with enterprise software.
- Ensure **smooth data migration and system compatibility** for new clients.

TESTING, DEPLOYMENT & PERFORMANCE TRACKING

- Perform UAT (User Acceptance Testing) to validate that features meet business requirements.
- Collaborate with cross-functional teams for feature deployment and system optimization.
- Expertise in evaluating business processes, identifying areas for improvement, and implementing solutions that drive efficiency and modernization.
- Led optimization strategies and ongoing reviews of business processes to align with the latest IT advancements, automating systems and processes.
- Strong communicator, capable of conducting meetings and presenting findings, performing requirements analysis, and documenting results clearly.
- Experience in gathering critical information from stakeholders, creating actionable reports, and ensuring solutions align with business needs.
- Adept at training, coaching, and providing leadership to junior staff, maintaining resource allocation and cost efficiency.
- Proven track record in managing projects, developing project plans, and monitoring performance to ensure successful completion within deadlines.
- Delivered 10+ end-to-end SAP ERP implementations across Retail, Distribution, Textiles, Trading, and Manufacturing industries.
- Trained 25+ internal staff and 200+ end-users, enhancing ERP proficiency.
- Managed onsite projects in GCC Nations, coordinating with clients, technicians, and management teams.

AI-BASED CONTRACT & PROCUREMENT MANAGEMENT | TERZO.AI

- Managed and worked with core modules, including Companies, Inventory, Product, People, Contracts, Workflows, Risk, and Reports to streamline business operations.
- Developed and optimized contract lifecycle workflows for better compliance and efficiency.
- Integrated vendor and procurement tracking within the system, ensuring real-time insights into inventory, supplier performance, and risk assessment.
- Utilized AI-powered analytics to enhance contract reporting, risk mitigation, and business intelligence dashboards.
- Automated workflows to improve procurement and contract approval processes, reducing manual intervention.
- Collaborated with cross-functional teams to enhance ERP and AI integrations for seamless business operations.

Core Modules: SAP

E-commerce and Retail integration with SAP B1,

- ensuring seamless synchronization of orders, inventory, and customer data for automated operations and real-time business insights.

Financial Management-

General ledger, accounts payable/receivable, banking, and financial reporting.

Sales & Customer

Management -CRM, sales orders, invoicing, and customer analytics.

Purchasing & Procurement

-Vendor management, purchase orders, and procurement tracking.

Inventory & Warehouse

Management -Stock control, batch/serial tracking, and warehouse operations.

Production & Material Requirements Planning

(MRP) – Bill of materials (BOM), production orders, and planning.
