Professional Summary

Dedicated and enthusiastic **M.Tech Computer Science student** with a strong academic background and keen interest in software development and machine learning. Skilled in programming and software tools with exposure to **deep learning and CNN models**. Passionate about building practical solutions, contributing to impactful projects, and continuously learning through hands-on experience.

Education

M.Tech – Computer Science (Pursuing) <i>Dayalbagh Educational Institute</i>	2024 – 2026 <i>Agra, UP</i>
B.Tech – Computer Science <i>A.K.T.U</i>	2019 – 2023 <i>Uttar Pradesh</i>
Intermediate (ICSE Board) <i>ICSE Board</i>	2017 – 2019 <i>Agra, UP</i>
High School (ISC Board) <i>ISC Board</i>	2016 – 2017 <i>Agra, UP</i>

Technical Skills

- Programming: C, Java (Core), Python (Basic)
- Data Structures & Algorithms (DSA)
- Database: SQL
- Machine Learning (ML) & Deep Learning (CNN)
- Web Technologies: HTML
- Tools: Anaconda, Visual Studio Code, Eclipse
- Technologies: TensorFlow, Keras

Projects

Rice Leaf Disease Detection using CNN

- Developed a deep learning-based solution to detect and classify rice leaf diseases such as **Bacterial Leaf Blight, Brown Spot, and Leaf Smut**.
- Built CNN models from scratch and using pretrained **VGG19** to improve prediction accuracy.
- Performed image preprocessing and augmentation using **Keras ImageDataGenerator**.
- Evaluated model performance using training, validation, and test accuracy along with confusion matrix and classification reports.
- Designed a **GUI-based prediction interface** for user-friendly disease detection.
- Enabled severity prediction using confidence scores to assist in early diagnosis and agricultural productivity.

Languages

- English – Fluent
- Hindi – Fluent

Hobbies

- Learning new technologies and exploring AI/ML concepts
- Problem solving and coding practice
- Reading and self-development
